About SynZeal

SynZeal is an ISO 9001:2008 certified company, accredited by JAS-ANZ for quality management systems. SynZeal is a research driven company providing full technical support for synthetic, analytical and medicinal chemistry. we are committed for high quality research products and services to comply research needs in timely, confidential and cost-effective manner.

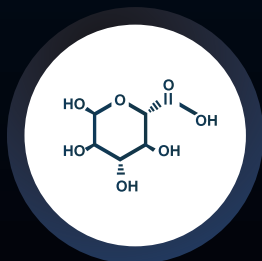

Our Products

Certified Pharmaceutical Reference Standards

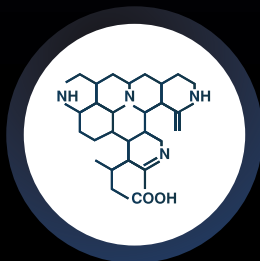

Stable Isotope Labelled Compounds

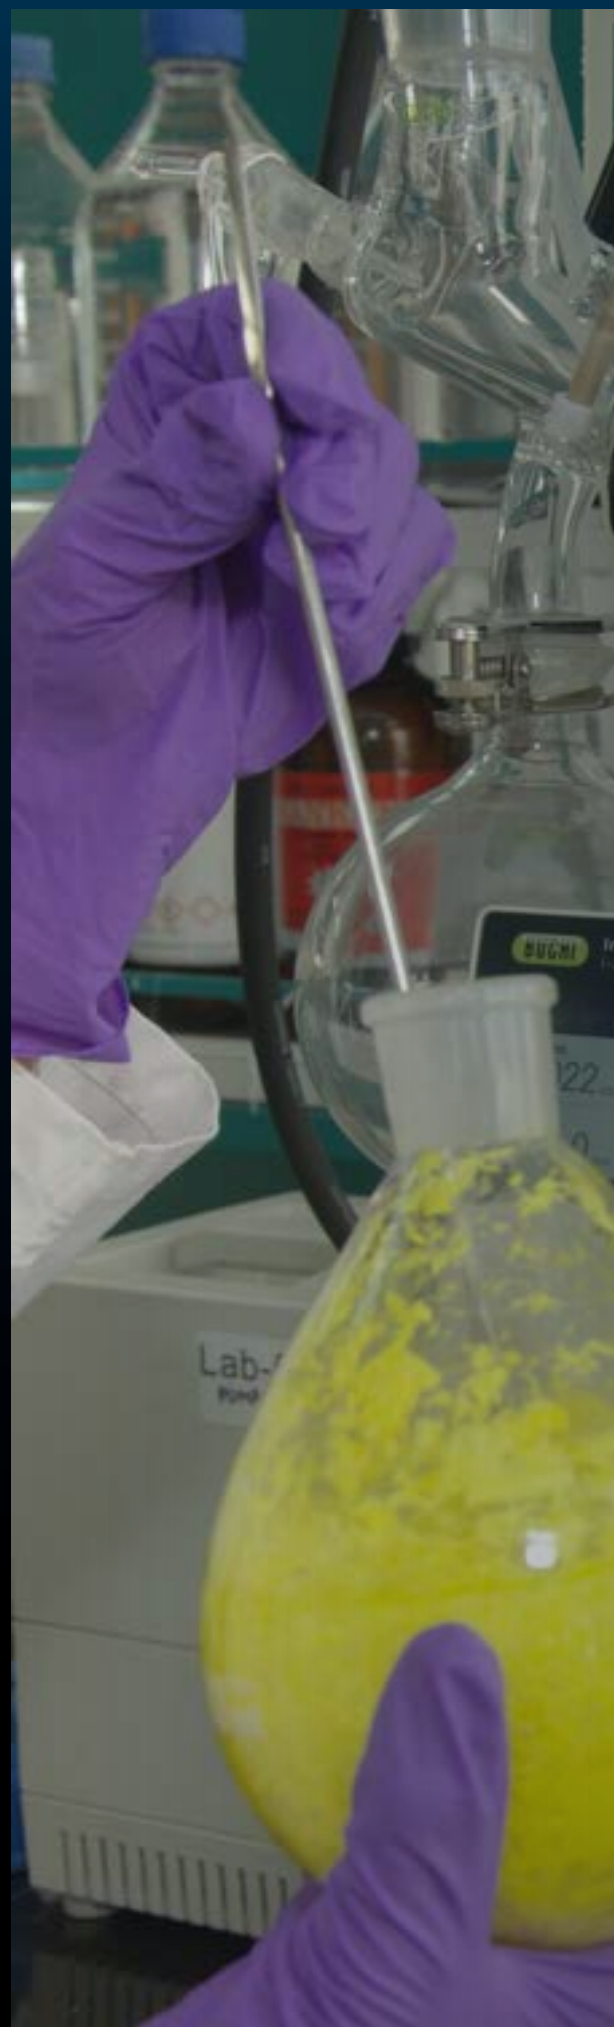

Drug Glucuronides

Early Stage API for R&D Supply

Focused Compounds Library Synthesis

A laboratory setting featuring a microscope, a scale, and a large yellow container. The background is a dark blue gradient.

Our Services

**Analytical Method Development
and Validation**

**LC-MS Analysis and Method
Development for Impurity Profile**

**Unknown Impurity Isolation and
Characterization**

**Mass Directed Purification by Flash
Chromatography and Preparative HPLC**

Medicinal Chemistry Support

**Early Stage API Technology
Development for R&D Supply**

Analytical Chemistry

SynZeal is well equipped with a wide range of fully qualified, analytical instruments. All data is peer reviewed and undergoes a technical QC review and quality assurance prior to release. SynZeal certificate of analysis includes all required characterization and purity data.

The Customized reports with any of the following analysis also available

¹H NMR | ¹³C NMR | HPLC Purity | Chiral Purity | LC-MS | Loss on Drying

Traceability to the Primary Reference Standard | Halide content by Ion Chromatography

Capillary Electrophoresis analysis | Elemental Analysis (C, H, N)

Thermogravimetric Analysis | Specific Optical Rotation (SOR)

We help our customer to understand chemistry aspect of regulatory queries and solve them in most efficient manner to meet their project deadline.

Synthetic Chemistry

SynZeal operates a state-of-the-art synthesis laboratory at Ahmedabad, Gujarat, India for custom synthesis of research chemicals, high purity pharmaceutical references standards, metabolites and rare discovery scaffold. Currently synthetic labs are operational with 48 fume hoods. SynZeal has highly qualified and professionally competent scientists with proven track record to deliver challenging chemistry projects.

Asymmetric Synthesis

Steroid Chemistry

Peptide Chemistry

Carbohydrate Chemistry

Nucleoside Chemistry
